📂 PROJECTS

Project Management Tool (CRUD) ⊡
Login (naveen@gmail.com , 1234)
The web application integrates a React.js frontend, allowing team leaders to oversee projects and users to submit work, with a Node.js and Express.js backend that manages data using MongoDB and secures routes with JWT, while Axios facilitates communication between the frontend and backend.

To-Do List Application (React) ⊡
A responsive web app for managing daily tasks like task creation, editing, deletion, and filtering by status. it includes reusable components. React hooks like `useState` and `useEffect.

IOT Based Smart Lab Automation
It's a main project at our college instructions

Spam Detection on Social media platforms
It's a mini project at our college Institute.
